# Centre Beaugrenelle

COMMERCIAL CENTRE IN PARIS

## Situation

Creation of a new shopping mall in Paris, close to the Paris Opera.

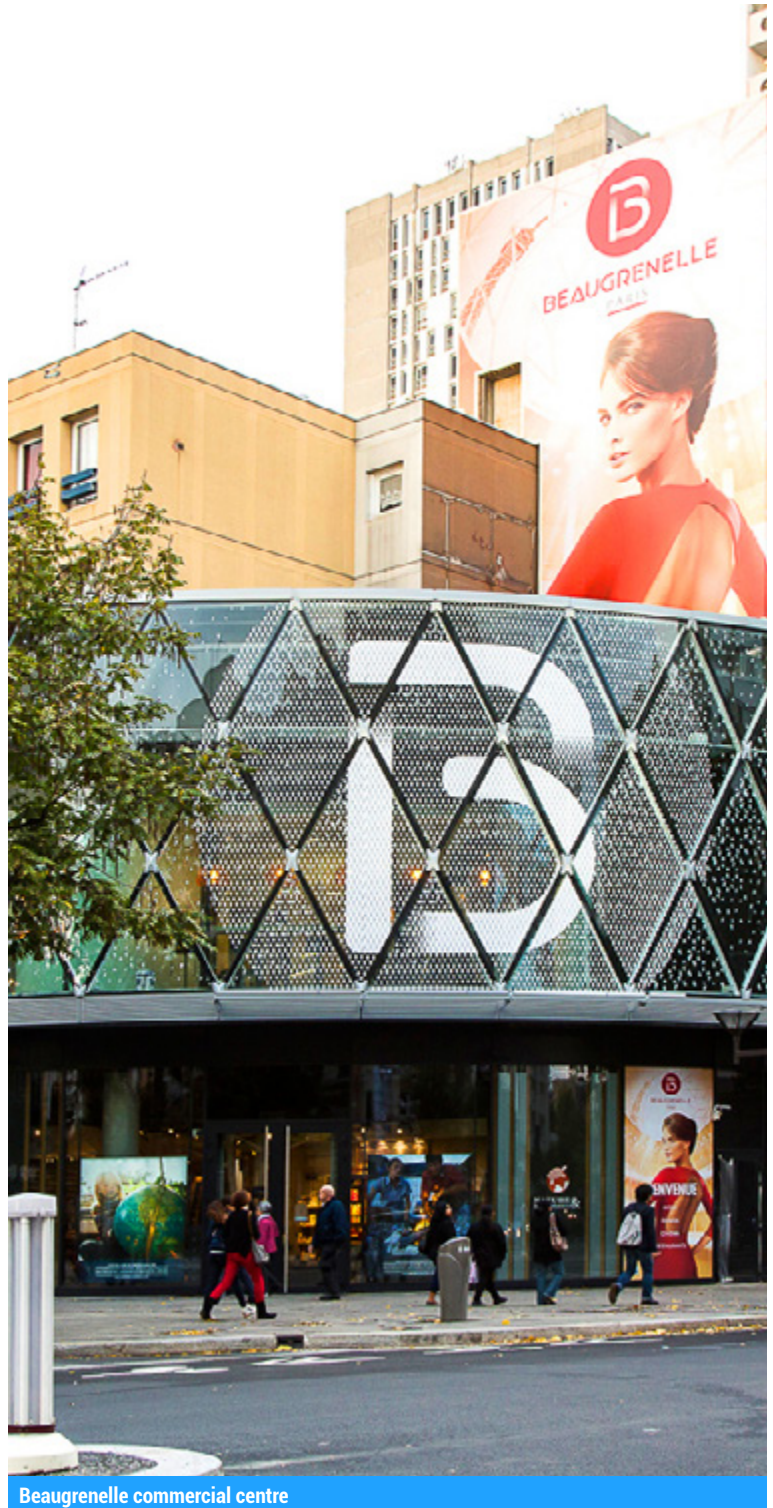

## Solution

Zenit was requested to provide pumps for the sewage system of the whole shopping mall, and for some fountains installed inside and outside the building.

We provided several kinds of sewage pumps, like DRN, MAN pumps for sewage and DRP and APN pumps for the fountains.

## Benefits

The pumps are working well, they expect to change some of the pumps for sewage by grinder pumps. They don't make any calculation on saving costs based on efficiency costs. They only want pumps which are working and this is the case.

Beaugrenelle commercial centre
