

Nantong Pinghai Highway Rapid Construction Project

Nantong, Jiangsu

Situation

Nantong Pinghai Highway Rapid Construction is one of the key transportation engineering projects of Nantong government. The highway is 28.3km in length with total investment of 56.5 million RMB, which be the main passage link from Tongzhou Bay to the city. Zenit's pumping station solve the rainwater and sewage collection and drainage issues smoothly along the under-crossing tunnels of the highway. This could effectively avoid the highway seep and storage when the rain season comes.

Solution

Pumping Station Type: BoxGRP 7 SETS

Pump Type:

ZUG OC250C 11/6AW 325	3 pcs
ZUG OC200B 7,5/6AW 270	3 pcs
ZUG OC250H 9/6AW 315	3 pcs
ZUG OC250C 11/6AW 325	3 pcs
ZUG OC300C 55/6AW 420	4 pcs
DRG 750/2/80 A0FT5	6 pcs

Benefits

As the provider of the water solutions and services in water treatment field, Zenit has been dedicated to the wastewater drainage industry for long time. UNIQA high-efficient series pumps are applied to the project, which guarantee the excellent performance of sewage drainage; also, Grey series pumps are the ideal choices of reliable and economic water solution.
