

# Xiamen Guanxunxi Sewage Interception Project

Fujian, China

## Situation

Xiamen Guanxunxi Sewage Interception Project is one of the arduous projects of Guanxunxi drainage basin management, aiming at collecting the wastewater of the reach from Jizhong Road to Shenhai expressway and incorporated to the municipal pipeline, so as to ensure the sewage be intercepted in rain season. Zenit provided the BoxHMP pumping station with 14.3m high and 2m in diameter.

## Solution

Pumping Station Type: BoxHMP high modulus polypropylene series pumping station 1 SET

Pump Type:  
ZUG OC150A 15/4 AW 2pcs

## Benefits

BoxHMP series pumping station is made of the high modulus polypropylene environmental material, which possesses the well mechanical performance and non-toxic, odorless and high-intensity features. It could be recycled as well. The UNIQA high-efficient series pumps applied could guarantee the great flow capacity with excellent operation performance.
