

BoxHMP Series Pumping Station be put into Zhangzhou Project

Fujian, China

Situation

The project is located at the intersection of Wenti and Yufeng Roads in Zhaoan County, Zhangzhou, which is mainly to address the wastewater drainage needs of industries of the upstream areas and the local residents. It calls for the pumping station building with the daily processing capacity of 23,000 tons. This is the first domestic HMPP pumping station with 3.5m diameters as its tank size and 9.2m in height.

Solution

Pumping Station Type: BoxHMP

Pump Type:
ZUG OC250H 30/4AW

Benefits

BoxHMP series of integrated prefabricated pumping stations are made of polypropylene (PP) composite material for large residential and civil fields. The environmental protection material is non toxic, odorless and safe. UNIQA pumps assorted are the great plus to give full play to its high efficient drainage ability and energy-saving advantage, which guarantees the stable operation in the long term.
