High efficiency be deployed in Guangdong

SUNMAX TECH PLAZA IN SHENZHEN

Situation

The Shenzhen High Tech Park of Nanshan area is an amazing landmark with its own beauty. However, the Sunmax Tech Plaza was facing drainage issues. The increased water pressure was accumulating on the road surface and too much water on the rooftop. To overcome this, water needs to be released.

Solution

With the assistance of Zenit's distributor, an installation took process. The products adopted were BOXPRO V/P and series/BlueBox 400s. By installing Zenit BOXPRO V with P series the product was put into use, after the quick installation.

Zenit's distributor took the responsibility of the installation work under the instruction of our service and technical staff. The post sales maintenance work will be conducted regularly.

Benefits

BoxPRO is an effective solution for water collection and lifting. After having concerns, the customer paid attention to the safety level and the energy consumption of the product. All of the requirements were satisfied, the solid and durable texture of BoxPRO enhances the reliability of the whole water lifting system.
