

# One Central Project

water solutions

THE STRATEGIC COOPERATION WITH KEY PARTNER SUNAC IN BEIJING

## Situation

**One Central** is one of the branch project of One Sino Park series of Sunac, one of the most famous real estate enterprises in China. The whole project targets "High-End" as the main design style by delivering the theme "Prominence" of the residential project.

It is located in Beijing by owning the advantaged position in commercial district. Aiming for selecting the reliable and stable assorted water treatment equipment for the construction, Zenit's lifting stations are listed and chosen.

## Solution

Twenty-six pieces *BlueBox400S* series lifting station assorted with *Blue* series pumps are installed in basements to collect the sanitary sewage in the public area.

The high quality polyethylene tanks are extremely versatile and easy to install. They are suitable for collecting clear, rain and wastewater from washing machines, sinks and WCs in systems installed at a lower level than the sewer, in locations such as garages or basements.

Product adopted:

*BlueBox400S* assorted with *GRBluePRO* series.

## Benefits

*BlueBox* series are suitable for domestic and small residential and civil installations. The easy and convenient installation could save the time and cost both for the customers.

The good sealing performance guarantees the air impermeability and water tightness.

Additionally, the large number of intake and outlet pipeline fittings allow optimal installation.
